

## **POLAR FROM SPACE**

우주에서 극지를 <u>보다</u>

The Center of Remote Sensing and GIS at Korea Polar Research Institute (KOPRI) is dedicated to advancing an integrated remote sensing network for polar regions. We continuously monitor the environments surrounding our polar research stations, as well as the broader cryosphere in both the Arctic and Antarctic.

As a permanent observer to the Arctic Council, we are committed to fulfilling our international responsibilities by providing accurate and reliable cryosphere remote sensing data.
